

# *Mini Miracle*

## *Your pocket sized self treatment center*

If you use Homeopathic or flower remedies for treating your own health issues, you must already be aware that purchasing individual remedies can be costly. If you need them on your travels, there is also the inconvenience of carrying a case vials with you wherever you go.

If you usually carry a remedy making machine with you that you paid hundreds or thousands of dollars for, you will also be aware of the risk of damage to it on your travels, through mismanaged handling at airports, and always a risk of theft.

The Mini Miracle is your solution to those problems. This is a very small self treatment device that makes any vibrational remedies you want in any potency, and in any power level up to 180 units (*more on that later*) and immediately sends them to you, so there are no pills to take. Built into a case only 80 x 40 x 20 mm and weighing 28 grams ( 1 oz ) there is only one button to press to initiate a treatment.

**To use:** Press the red button down and speak the name of any vibrational remedy you want. This could be a Homeopathic, Flower, Gem, or Color Remedy, then speak the Homeopathic Potency you want ( if any ) and the power level. Say 30 units if you want the same strength as a remedy from a Homeopathic pharmacy, 60\* units if you want it a bit stronger, 90 units if you want immediate results, and up to 180 units if it's a very acute problem, and hold the button down as long as you need that treatment, then release it when you feel you have had enough and the treatment will end.

\*If you don't speak a power level in, the default is 60 units.

**Please note:** this device cannot be used by you to send a remedy to anyone else as the device only treats the person pressing the button and speaking, but other people can use it so long as they are the ones holding it, pressing the button and speaking. Also note, the device has no internal memory so you cannot repeat a treatment without speaking the details in again, if you release the button half way through speaking, you will have to press it again and go back to the start.

It is highly recommended that users have some knowledge of Homeopathy and vibrational medicine, so they will know what remedies to take for the condition they are attempting to treat. There are lots of books available on the subject. The device requires no batteries as it is powered by Universal Energy that will never run down.

**Cautions:** The device is not watertight so please do not submerge it in water. Placing the device next to a magnet may destroy it and it will not be repairable.

Also please make sure children do not play with it, this is not a toy and they could harm themselves by pressing the button and saying something. If this happens we are not responsible for any harm that occurs, that is the sole responsibility of parents.
